

from Cape Cod...Wind River recording artist

David Roth

w/Colleen Crosson in Fort Collins!
Thursday June 11th ~ 7:30 PM

We are delighted to welcome award-winning singer/songwriter **David Roth** to our house in Fort Collins. David's songs have found their way to Carnegie Hall, the United Nations, several *Chicken Soup for the Soul* books, the Kennedy Center, Peter, Paul, & Mary concerts, NASA's Goddard Space Center (David's "Rocket Science" just went up on the Space Shuttle Atlantis on 5/11!), 10 CDs on the Wind River and Stockfish (Germany) labels, and countless venues in this and other countries.

The Chicago native (now living on Cape Cod) embraces his 22nd year of full-time music, and his latest (and 10th) CD "Practice Makes Progress" was released in 2008. David's music strikes many chords, hearts, and minds with his unique songs, offbeat observations, sense of the hilarious, moving stories and powerful singing and subject matter, and we're psyched that he's coming to Colorado a night early to add Fort Collins to his appearances in Colorado Springs, Swallow Hill (Denver), and Boulder...and **Colleen (www.colleencrosson.com) will open the show...**

"David has reached our hearts. With voices like his still singing, there's a certainty that the candle will remain lit, the hope reasserted and the dream still sung..."

Peter Yarrow (Peter, Paul, & Mary)

"David and his music will touch you to the very depths of your soul. He'll make you laugh and cry, inspire you to rise and fly..."

Jack Canfield, co-author, *Chicken Soup for the Soul*

"David's pure, smooth voice, unsurpassed instrumental ability, incredible humor, and heart-piercing, intelligent lyrics brought a feeling into our concert hall that cannot be described - except perhaps by the word "harmony". It was as if folk music, New Age, comedy club, coffee house, and a bit of heaven had all come together for one evening."
